

My family finds the weather and traffic information on XM to be the best available!!! Any curtailment of these services would be deemed by us to be a tragedy of the first order far exceeding the impact of 9/11 or Iran or Iraq (we have to deal with Houston traffic twice daily). These services have helped us to deal with traffic far better than anything else that is available from any other source. I am sure the only reason the NAB is attempting this is to bolster sagging revenues from advertising on "Regular" radio stations. For me and mine I urge the FCC to reject NAB's petition 04-160.
